

Our business is people and their love for trees®

## Tree and Stump Removals

As our name implies, we care for trees. We try to do everything possible to maintain the health and vitality of your trees, but sometimes the removal of a tree is necessary due to storm damage, a poor location, or an unhealthy condition. We strive to find the safest solutions for high risk and difficult tree removals.

The logs and stumps are often removed by separate crews as soon as possible during the next few days. Stumps are removed usually within two weeks of the tree removal. They are ground out using a cutting machine that mulches the stump into small chips. Stump chips are left on site unless other arrangements are made, and they serve as excellent mulch around other plants. Both log and stump removals are weather dependent as soft, wet ground may prohibit our access.

### More Than the Finest Tree Care

Many of our clients have been with us for decades. They are testimony to the fact that in addition to providing the best tree care, we are committed to providing the best client care, too. From consulting on your trees' needs, to scheduling the work, to arriving on time and cleaning up when the job is complete, The Care of Trees is serious about ensuring your complete satisfaction. Call us today to schedule an appointment with a professional arborist.
